LinkedIn | GitHub | TokenCraft (PyPI) | La Roche Cafe (Live)

PROFESSIONAL SUMMARY

Electronics & Computer Science undergraduate seeking an AI/ML internship, with hands-on work in transformer language models, reinforcement learning, computer vision, and data analysis. Built a decoder-only GPT model in PyTorch and published it on PyPI; also experienced in delivering full-stack applications and translating operational data into decisions.

TECHNICAL SKILLS

Programming & Data: Python, JavaScript, NumPy, Pandas, SciPy, Matplotlib, Seaborn, EDA, data preprocessing
Machine Learning & Deep Learning: PyTorch, TensorFlow, Keras, Scikit-learn, Gymnasium, Stable-Baselines3, computer vision
Generative AI & NLP: Transformers, self-attention, Hugging Face, LangChain, LangGraph, RAG, LoRA/QLoRA
Development & Tools: FastAPI, REST APIs, Git/GitHub, React, Node.js, Express, MongoDB, Socket.IO

SELECTED TECHNICAL PROJECTS

TokenCraft (tokencraft-gpt) | Python, PyTorch, Transformers | Published on PyPI

- Implemented an educational decoder-only GPT architecture from scratch, covering tokenization, token IDs, token/positional embeddings, causal self-attention, multi-head attention, feed-forward networks, and transformer blocks.
- Built the next-token prediction training workflow and autoregressive text generation, exposing the model and tokenizer through a reusable Python package.
- Published tokencraft-gpt v0.1.1 on PyPI under an MIT license (October 2026), with an installable package and documented learning-oriented API.

InterruptIQ-RL | Python, PyTorch, Stable-Baselines3, Gymnasium, FastAPI, React

- Developed a context-aware notification scheduling system using reinforcement learning to reduce unnecessary interruptions while prioritizing time-sensitive notifications.
- Designed a custom Gymnasium environment with contextual states for notification urgency, user focus, deadlines, backlog, and interruption history.
- Defined Deliver, Defer, Bundle, and Escalate actions and a reward function balancing interruption reduction, timely delivery, and user satisfaction; developed baseline policies and designed a DQN-based adaptive agent.

Echoes of India | Python, Computer Vision, Audio Synthesis | Research / In Development

- Exploring an AI-assisted approach to reconstruct plausible sounds of ancient or extinct musical instruments from a photograph, combining visual instrument analysis with audio synthesis.
- Investigating how visual features could inform estimates of timbre and pitch; presented the concept as a first-year capstone research project. Sound reconstruction remains an exploratory objective.

La Roche Cafe | React, Node.js, Express, MongoDB, Socket.IO, Razorpay | Live Application

- Built a campus food pre-ordering application with student and kitchen roles, live order status updates, and a real-time kitchen dashboard powered by Socket.IO.
- Implemented configurable menu variants and add-ons, cart and checkout flows, dynamic GST/packaging calculations, and Razorpay payment integration; addressed deployment, authentication, and environment configuration issues.
- Future scope — under development: Evolve the single-canteen application into a multi-campus platform supporting independent menus, pricing, kitchen dashboards, and canteen onboarding.

PROFESSIONAL EXPERIENCE

Operations Manager | Eyeconic by Dr. Lalla | Feb 2025 – May 2025

- Coordinated operations for 250+ students and 9 mentors across content, technology, and student-success functions; tracked KPIs through Google Sheets dashboards and converted findings into process improvements.
- Developed standardized operating procedures linked to an estimated 25% faster team turnaround; managed escalations and mentor onboarding.

Operations Assistant | Eyeconic by Dr. Lalla | Oct 2024 – Jan 2025

- Maintained student databases, generated weekly and monthly KPI reports, identified student-journey bottlenecks, and earned promotion within four months.

EDUCATION

B.E., Electronics & Computer Science Engineering | Shah & Anchor Kutchhi Engineering College, Mumbai | 2025–Present
AI/ML Program | Masai School in association with IIT Patna | Jan 2026–Present | CGPA: 8.5
HSC (Science) | Mithibai College | 2024 | 72% SSC | C.B.M. High School | 2022 | 91.6%
